

CLR CannulaMan

AN ADULT ECMO CANNULATION TASK TRAINER

AFFORDABLE
REUSABLE
ULTRASOUNDABLE

CannulaMan

Designed to provide an immersive and realistic experience.

CannulaMan empowers medical professionals to enhance their skills and expertise in ECMO Cannulation

Team Training

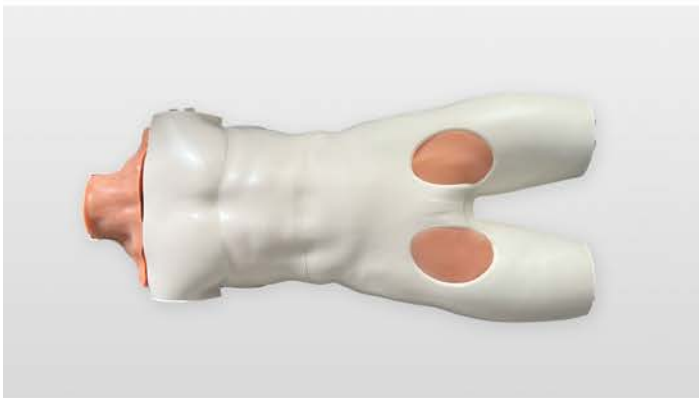

Practice the entire process, including insertion, securing cannulas, and managing potential complications, without putting actual patients at risk.

Ultrasoundable Tissue
Visualize the jugular vein, femoral vein & artery.

Quick Connects
Fill and drain CannulaMan with ease.

Full Adult / Adolescent Body

CannulaMan reduces the need for using expensive resources, such as ECMO machines, consumables, clinical staff's time, and training on patients

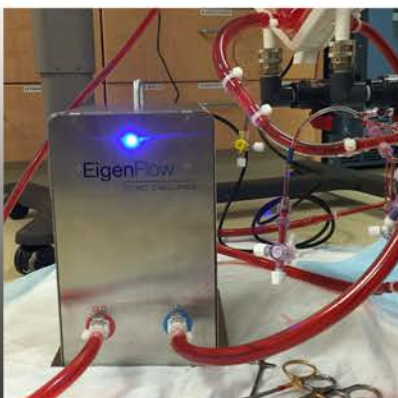

Jugular Cannulation

CannulaMan allows users to practice the correct technique for jugular cannulation, including needle insertion, guidewire placement, and cannula advancement.

Recyclable Tissue
Purchase recycled tissue at an affordable price.

EigenFlow ECMO Simulator
Combine for advanced air entrainment scenarios

Two Pieces
Compact footprint

CannulaMan can be assembled into two pieces and can fit in a compact, travel friendly, Pelican Air 1637 case.
